Just copy this lead, but connect as your 9PIN should be on your monitor. This should help with PIN/S to connect to your end of 9PIN. I’m in Canada and I finally found 23 pin connectors!!! Okay, not very exciting, but it took nearly 3 years to get to this end to build a cable. There are tons of 15 pins and DIN plug configurations, but this seems to be the European standard. for offering a cable a few years ago. Point to point (this is: pin1 to pin 23 etc ... This brings me back to pinouts.ru where I tried a monitor search .... I think below is a list of every PIN on the Amiga video port. Have a look to see which one you have from here and then search for their lead by model number. As an example, a 1084st is connected differently on port 9pin than the 1084S D1. Best of luck. Thank you for the information. For developers as well. 2010. Google “Images/Images” can be more useful than crawling, although sites that couldn’t find anything. I would also look for the leads of the Commodore 1804 Monitor, as these are more common and can help even more with what is needed or if some component is needed ...
