To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Geoffrey Fortier 5.0 out of 5 stars When this one came up on Amazon I thought there must be something wrong with it, but after some research it was actually a pretty respectable model. It arrived promptly and in perfect. A few things to know. This version is meant to be mounted on a wall or ceiling, it is not freestanding. I was looking for the former, so I was totally satisfied. Its pretty light. I assure you it will retract fully and easily once you get the motion down. The back is black and very opaque. I mounted my screen on removable ceiling brackets, but it looks so good that I rarely take it down. In the future, I may build a freestanding frame so I can use it outside on occasion. Summer movies on the rooftop anyone Projecting on a screen as opposed to projecting on a wall makes a BIG difference as many have attested. My movies look more crisp and the colors look more vibrant not washed out. They look almost as good in the daytime as they do at night. The screen is matte white as described. The screen is perfectly smooth and free of rumples. My screen in particular has a little red speckle in an inconspicuous area of the screen nothing a little whiteout cant fix but is otherwise cosmetically perfect. The screen is made in the USA. Woohoo! The screen does not come with hardware for mounting it to a wall or ceiling. <http://leeharringtonhomes.com/userfiles/business-financial-calculator-el-733a-manual.xml>

- **da-lite model b manual wall and ceiling projection screen, da-lite model b manual wall and ceiling projection screen door, da-lite model b manual wall and ceiling projection screens, da-lite model b manual wall and ceiling projection screen doors, da-lite model b manual wall and ceiling projection screen size, da-lite model b manual wall and ceiling projection screen repair, da-lite model b manual wall and ceiling projection screen system, da-lite model b manual wall and ceiling projection screen tv, da-lite model b manual wall and ceiling projection screen windows.**

It does have a hole in the back on each end for wall mounting and a ring on each end for mounting on Impede the retraction just enough especially towards the end of its run so the end of the screen doesnt slam into the housing at full speed. So, STOP projecting on a wall. At the current price just over 50, its well worth the investment!As the other reviews have stated, the screen does not come with any mounting hardware. Youll need your own screws wall installation or hooks ceiling installation in order to install it. If you are installing it on a home ceiling, swag hooks like you would use for a hanging plant will work. On the wall youll need to find studs or use sturdy drywall anchors. Installation should be easy and intuitive once you see the unit, and regardless of installation method it is easy to take the screen down and store it if you would like to. The screen seems high quality, however I am admittedly not a screen connoisseur. It is definitely better than using a bare wall. The screen does stink like chemicals when it is down, enough to smell it in a large room. I suspect that smell will go away with time. My only complaint is that its not the easiest to get the screen back up. It doesnt seem like it should be rocket science like any other type of pull shade you pull down and allow it to go back up, but this screen doesnt work that way. I can use the same technique over and over again and sometimes it works and sometimes it doesnt. Its a mystery. It shouldnt be. The price with free shipping simply cannot be beat. I am happy with my purchase and would recommend it to others.In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading.
